WEEKLY REVENUE

● All-in-one POS & ERP for Saudi businesses

Run your entire shop from **one screen.**

Billing, stock, purchasing, accounts and ZATCA e-invoicing — connected, bilingual and fast. Built for supermarkets, restaurants and retail.

نظام واحد لإدارة متجرک بالكامل

ZATCA Phase 2 ready

Arabic & English

Works offline

Multi-branch

POS & ERP editions

Everything your business runs on. Finally in one place.

Stop juggling a till, a spreadsheet and an accountant's software. Every sale in SiztOS updates your stock, your customer balances and your books — instantly, across every branch.

Point of Sale

Lightning-fast billing on desktop, tablet or phone, with barcode scanning, split payments and printed receipts.

Barcode Hold & recall Kitchen tickets

Sales & Invoicing

Tax invoices, quotations, delivery notes and returns — shared on WhatsApp in one tap.

Quotations Delivery notes WhatsApp

Smart Purchasing

Upload a supplier's PDF bill and SiztOS reads it for you. Purchase orders, cost tracking and supplier statements.

PDF / OCR import Purchase orders

Inventory & Branches

Live stock by store, barcode labels, adjustments and transfers between branches with receive confirmation.

Multi-store Transfers Labels

Accounts & VAT

Double-entry ledger posted automatically: vouchers, statements, ageing, trial balance, P&L and VAT returns.

Auto-posting P&L VAT report

Online Store

Publish your catalogue online with offer prices. Customer orders arrive straight into SiztOS as quotations.

E-commerce Offers Delivery zones

languages: Arabic & English, side by side

0

manual uploads needed for ZATCA

A till your cashiers learn in five minutes.

Big touch-friendly tiles, instant barcode search and every payment type — designed for the Friday-evening rush. English and Arabic product names side by side.

- ✓ **Barcode & scale items** — scan, weigh and bill in seconds.
- ✓ **Hold & recall** orders so the queue keeps moving.
- ✓ **Shift open & close** with cash-count reconciliation.
- ✓ **Mobile POS** for waiters and floor staff on any phone.
- ✓ **Split payments** across cash, card and credit customers.
- ✓ **Kitchen order tickets** routed to each kitchen printer.
- ✓ **80 mm receipts** with the ZATCA QR code, printed silently.
- ✓ **Price & discount control** by user, with below-cost protection.

Compliance that happens while you sell.

Every invoice is generated, signed and reported to ZATCA's FATOORA platform automatically — simplified invoices are reported, standard B2B invoices are cleared. No extra software, no manual uploads.

Branch stock transfers

Runs in your shop. Reachable from anywhere.

SiztOS runs on a PC inside your shop, so billing never stops when the internet does. A secure, encrypted tunnel gives owners their own web address to check sales from home — no fixed IP, no open ports.

Offline-first

Tills keep billing over the shop network even if the internet drops.

Secure by design

Encrypted HTTPS, email-verified owner access, internal pages locked down.

Daily backups

Automatic nightly database backup, 15 days kept on the shop PC.

Multi-branch

Each branch runs its own server; transfers move stock between them.

One-click install

A single Windows installer sets up the database, app and shortcuts.

Bilingual

Arabic and English names, receipts and right-to-left printing.

**Billing never waits for the internet.
Owners never wait to see the numbers.**

بياناتك في متجرك، ومتاحة لك في كل مكان

Start with billing. Grow into the full system.

Not every shop needs accounting on day one. Choose the edition that fits today — both run on the same installer, the same database and the same ZATCA engine.

SIZTOS

ESSENTIAL

POS

For shops, cafés and restaurants that simply need fast, compliant billing.

- ✓ Fast POS on desktop, tablet & phone
- ✓ ZATCA e-invoicing & QR receipts
- ✓ Products, prices & barcodes
- ✓ Shifts, cash closing & sales reports
- ✓ Kitchen tickets for restaurants

SIZTOS

COMPLETE

ERP

For businesses that want sales, stock, purchasing and accounts in one place.

- ✓ **Everything in POS, plus:**
- ✓ Invoices, quotations & delivery notes
- ✓ Purchasing with supplier PDF import
- ✓ Inventory control & branch transfers
- ✓ Full accounting, P&L & trial balance
- ✓ Online store

Upgrade from POS to ERP any time — in minutes.

We send a new license key and the extra modules switch on. No reinstall, no data migration: every product, sale and customer stays exactly where it is.

From unboxing to first sale in a single day.

We install, configure and train your team. You keep your data, your hardware and your peace of mind.

01

Install

Pick POS or ERP. One installer on your shop PC sets up the database, the app, desktop shortcuts and daily backups.

02

Set up

Add your store details, VAT number, logo, users and products — or import them from your old system.

03

Start selling

Open the POS on every till, link to ZATCA, and watch sales from your phone wherever you are.

See SiztOS live.

Scan the code to open our live demo, or book a walkthrough and we'll show you SiztOS running on your own products.
